EDUCATION

UNIVERSITY OF TORONTO **Toronto, ON**
Bachelor of Science; Specialist in Computer Science Sep 2018 – Dec 2021

Relevant Coursework: Data Structures & Algorithms, Software Design, Full-Stack Web Development, Database Design, Neural Networks & Deep Learning, Artificial Intelligence, Operating Systems, Video Game Design

SKILLS & CERTIFICATIONS

Languages: Python, Java, C, C#, HTML/CSS, JavaScript, SQL
Frameworks: React, Node.js, Express, Django, Flask
Technologies: Git, PostgreSQL, MongoDB, TensorFlow, PyTorch, Android Studio, Unity
Certified Associate in Python (Python Institute)**, Certified Data Scientist** (DataCamp)

PROFESSIONAL EXPERIENCE

MetaVision Labs **Toronto, ON**
Game Developer & Web Developer | C#, Unity, React May 2021 – Present

- Developed a 2D game in **C#** and **Unity** and helped design the vision and implementation of game features
- Performed product design role and helped in launching prototype 3 weeks earlier than planned
- Partnered with other teams to tune content towards creating a better experience for players
- Secured up to $100K in funding for cloud services by registering with Amazon's AWS Activate Portfolio program
- Integrated Smart contracts into the Unity game using **C#** and the company website using **React** and **Web3.js**, powered by Ethereum

CustomerBuds **Toronto, ON**
Full-Stack Web Developer | Python, Django May 2021 – Aug 2021

- Developed a full-stack website with a landing page and a backend for blog posts, using the **Django** framework
- Conceptualized the design of the website and improved the user experience of the website

HiGarden – The Guardian App **Toronto, ON**
Game Developer | C#, Unity Sep 2020 – Dec 2020

- Developed a planting simulator game in **C#** and **Unity** with a team of seven and worked in an Agile environment to expand and deploy the game
- Advanced the game by adding several new levels and managed to significantly decrease the size of the game by 73% by using design techniques such as object pooling

PROJECTS (check website for more!)

JOB APPLICATIONS TRACKER **Toronto, ON**
React, Node.js, Express, MongoDB Sep 2021

- Developed a full-stack web app with user authentication that allows users to add and track the status of their job applications, including what stage they are at and the recruiter information to be able to quickly send emails

PIZZA PARLOUR REST API **Toronto, ON**
Python, Flask, HTML, CSS Dec 2020

- Developed a RESTful API with the **Flask** framework for a virtual Pizza Parlour restaurant that takes both pick-up orders and mobile orders from apps like DoorDash and Uber Eats
- Created a set of comprehensive tests that resulted in 92% coverage, using Python unit-tests and Mocha testing

GAME CENTER **Toronto, ON**
Android Studio, Java, UML, SQLite Dec 2020

- Developed an Android app with 3 mini-games in it – a Math speed run game, a whack-a-mole game, and a card-matching game
- Implemented the app using various design patterns, and used a SQLite database to hold users' scores and assist in user authentication
